A FEW MORE WORDS ABOUT PRINCETON PRODUCTS

Our Nursery at Princeton comprises over 500 acres devoted to the production of the highest grade stock of wide variety.

We are always on the alert to improve our stock, our methods of handling it and our business generally and we ask your co-operation, for we take pride in our work and we want you to profit by our efforts.

You have our assurance that all stock will be in good condition when it leaves our hands, but we naturally cannot guarantee it to grow under all conditions, nor can we make up losses arising from climatic effects or culture. We try to be fair in the matter of any adjustments and we ask our customers to reciprocate this feeling, which we might add we find in almost every case is done.

We are always glad to have you visit our nursery and if it is possible for you to do so, a map and more detailed instructions will be found on the last page of this booklet.

Packing house and storage cellar, Princeton Nurseries. They are on our own siding which insures the minimum of exposure when loading and facilitates rapid shipment. We specialize in carload orders for which no charge is made for packing.

PRICES

Prices are F. O. B. Kingston, N. J., and are as low as is consistent with the market, taking into consideration that the stock offered is of the best quality, carefully grown, with ample room for full development. Princeton grown stock should not be compared with poorly grown plants frequently offered. Prices are for Spring 1927.

CREDIT AND TERMS

We are glad to extend credit on the basis of our regular terms to established nurserymen who are known to us, or are rated satisfactorily. Cash before shipment is required from parties unknown to us, who have no commercial rating.

Terms, 2% 10 days, 1% 30 days from date of invoice, 60 days net. Interest at 6% will be charged on overdue accounts, Spring accounts from July 1st, Fall accounts from Jan. 1st.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days time after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

PACKING

Bales and Boxes charged at cost. No packing charge is made for stock packed in full carlots. Boxes are made in the following sizes:

Deciduous Trees, Shrubs, Evergreens and Vines

NOTE—The figures in italics, following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

We recommend that all varieties marked with an asterisk be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way. This will involve an extra charge per plant, as follows:

2'-4', 25c *4'-6'*, 40c *6'-8'*, 60c *8'-10'*, 75c

Larger sizes in proportion. In all instances where varieties are marked B. & B., these charges are included in the printed price.

FRENCH LILACS—NAMED VARIETIES

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs generally grow from 6'-12' in height, depending on the variety and locality.

Two year Apples, grown at Princeton. Our fruit trees are clean, fully up to size, and true to name. We do not grow immense quantities of fruit trees, but have enough to supply the needs of customers who want a medium quantity to go in an assortment order. By growing them ourselves, we can stand back of them and know that we are delivering the right kind of stock.

FRUIT DEPARTMENT

Graded according to Horticultural Standards, 1923, of the American Association of Nurserymen. Caliper taken two inches above bud.
